

## How to put the PetBuckle Seat Belt harness on your dog

(1) Unfasten all buckles on harness. Place loop over dog's head, bringing the loose straps under the dogs legs and resting the buckles and metal rings on dogs back.

(2) Adjust the triangle web guide to the lower portion of the dog's chest, allowing the straps to crisscross. The straps must crisscross to hold your pet in a sudden stop.

(3) Insert the adjustable tongue into the buckle on each side of the harness.

(4) Tighten the harness by pulling on the free-end of the straps. Note: to loosen harness push the adjuster towards the tongue to create slack.

To remove the harness, push the red release buttons on the buckles and lift harness off the dog.
